## Change in the management of VIACOR Polymer GmbH

Dear customers and business partners,

You know VIACOR Polymer GmbH as a competent and reliable partner. With our innovative and sustainable systems for industrial floor coatings, sports floors and waterproofing, we have been able to support you in your commercial success for years. We thank you for your long-standing trust!

The success story of VIACOR Polymer GmbH began more than 20 years ago. At that time, Dr. Joos founded VIACOR Polymer GmbH to develop, manufacture and distribute solutions for sports and industrial floor coatings worldwide.

In order to successfully expand this business, VIACOR Polymer GmbH and Sto SE & Co KGaA decided in 2020 to embark on a joint path. This allowed us to leverage synergies between the two companies and provide you with even better support.

Today we would like to inform you about a change in the management of VIACOR Polymer GmbH.

**Dr. Ralf Jooss** has decided to take on new challenges. Until the appointment of a new Managing Director, **Alexander Gänsler** will lead VIACOR Polymer GmbH. Mr. Gänsler is responsible for the Concrete Repair and Floor Coatings business unit of Sto SE & Co. KGaA

In this role as Managing Director, Alexander Gänsler will be supported by the efficient team of VIACOR Polymer GmbH with which you are familiar. We are very pleased that the previous Sales Manager Michael Nüssler (Region Germany, Austria, Switzerland) has returned to support you in the usual way. Your usual contact person for the products under the brand Porplastic are still at your disposal.

With great confidence and pleasure, we look forward to the successful continuation of our trusting cooperation with you.

With kind regards

Thade Bredtmann  
Vice President Human Resources Sto Group  
Member of the Management Board Sto SE & Co. KGaA

Alexander Gänsler  
General Manager VIACOR Polymer GmbH
