GREEN LINE ECO

VIASOL **GREEN LINE ECO** products are tested and certified low emission floor coatings for rooms where people permanently live and work according to the requirements of the German AgBB. VIACOR sets standards with quality and future-oriented developments.

Rooms where people spend a long time must fulfil high environmental, health and safety requirements for good reasons. Therefore special requirements for those rooms have been set up.

AgBB is the "Committee for the health assessment of construction products", which assesses from a health point of view the emissions of volatile organic compounds (VOC) from construction products. These may represent a significant source of contamination of the indoor air by volatile organic compounds. To evaluate this uniform and comprehensible an evaluation scheme for VOC emissions from indoor building products was developed.

VIACOR has many low emission systems based on epoxy or polyurethane resins:

VIASOL – PU-coatings:

VIASOLELASTIC/UNIFLEX Systems (only low emission)

VIASOLELASTIC
 VIASOLELASTIC UV
 VIASOLELASTIC soft
 VIASOLELASTIC UV soft
 VIASOLELASTIC SKY
 VIASOLELASTIC SKY soft
 VIASOLELASTIC vertical
 VIASOLUNIFLEX
 VIASOLUNIFLEX SR
 VIASOLUNIFLEX conductive

GREEN LINE ECO

VIASOL- EP-coatings:

All systems are available in standard or low emission version. Please refer to the low emission products.

VIASOL*UNIVERSAL* Systems (only low emission)

VIASOL*UNIVERSAL*
VIASOL*UNIVERSAL SR*
VIASOL*UNIVERSAL SKY*
VIASOL*UNIVERSAL SKY voltex*
VIASOL*UNIVERSAL high-impact*
VIASOL*UNIVERSAL voltex*
VIASOL*UNIVERSAL voltex SR*
VIASOL*UNIVERSAL ESD*

VIASOL*DESIGN* Systems (only low emission)

VIASOL*DESIGN QCV*
VIASOL*DESIGN QNV*
VIASOL*DESIGN QCV conductive*
VIASOL*DESIGN QCV ESD*

VIASOL*PERM* Systems (only low emission)

VIASOL*PERM*
VIASOL*PERM SR*
VIASOL*PERM conductive*
VIASOL*PERM protective / vertical*

GREEN LINE ECO systems are made with this logo:
